○ For additional details on my professional background, please refer to my LinkedIn profile.

Projects

These projects were built during my enrollment in Ironhack's Web Development Program

○ Moonlight

- Developed a MERN web application for event discovery and attendance, featuring a real-time chat for attendee connectivity.
- Technologies used: React.js, CSS, HTML, JavaScript, Node.js, Express.js, MongoDB, Socket.io.
- Explore the project at [Moonlight](#)

○ Outbackers

- Constructed a web platform connecting backpackers with temporary jobs and housing opportunities.
- Technologies used: HTML, CSS, Handlebars, Javascript, Node.js, Express.js, MongoDB.
- Experience the project at [Outbackers](#)

○ Yoshi Run

- Created a entertaining web-based game where Yoshi navigates obstacles.
- Technologies used: HTML, CSS, Javascript.
- Play the game at [Yoshi Run](#)
